

AEGION®

Stronger. Safer. Infrastructure.®

Singapore Insituform Locations

Insitu Envirotech (S.E. Asia) Pte. Ltd. is the operations group for Insituform's trenchless rehabilitation companies and divisions located in Asia.

We manage and control sewer and water main lining projects on behalf of water and wastewater companies. We employ people with long-term experience in the pipeline renovation industry at all levels of our company. We give our clients full traceability through all stages from the manufacture to installation of Insituform® CIPP.

We enjoy access to the engineering and research and development resources of Insituform Technologies, LLC, a leading provider of proprietary technologies and services for rehabilitating sewer, water, energy and mining pipelines and corrosion protection of industrial pipelines.

Our portfolio of products include Insituform® CIPP, iPlus Infusion®, InsituGuard® and InsituMain®.
