

AEGION®

Stronger. Safer. Infrastructure.®

Insituform Asia-Pacific Locations

We manage and control sewer and water main lining projects on behalf of water and wastewater companies and employ people with long-term experience in the pipeline renovation industry at all levels of our company. We give our clients full traceability through all stages from the manufacture to the installation of Insituform® CIPP.

We enjoy access to the engineering and research and development resources of Insituform Technologies, LLC, a leading provider of proprietary technologies and services for rehabilitating sewer, water, energy and mining pipelines and corrosion protection of industrial pipelines.
