CIPP Technical Envelope

The following table refers to general purpose municipal sewer cured-in-place pipe projects. Insituform® can provide CIPP products that extend beyond these parameters through our engineering group. Contact us for additional information.

Diameter Range	6 to 124 in
pH Range	0.5 - 10.5
Effluent Temperature	up to 140° F
Fully Deteriorated Condition	Yes
Partially Deteriorated Condition	Yes
Bends	Yes
Offset Joints	Yes
Diameter Changes	Yes, without manhole access
Thickness Changes	Yes, without manhole access
Typical Shot Length	200 to 1000 ft
Host Pipe Shape	All Shapes
Host Pipe Material	All Materials
