Insi
form
Asia Ltd.

Hong Kong

Insi form Asia Ltd. is part of the world-leading Insi form group of trenchless rehabilitation companies and currently does business in Hong Kong.

We manage and control sewer and water main lining projects on behalf of water and wastewater companies. We employ people with long-term experience in the pipeline renovation industry at all levels of our company. We give our clients full traceability through all stages from the manufacture to the installation of Insi form® CIPP.

We enjoy access to the engineering, research and development resources of our Insi form Technologies, LLC, a leading provider of proprietary technologies and services for rehabilitating sewer, water, energy and mining pipelines and corrosion protection of industrial pipelines.

Our portfolio of products to include Insi form® CIPP, iPlus Infusion®, InsiMain®, Thermopipe® and InsiGuard®.
