

AEGION®

Stronger. Safer. Infrastructure.®

Insituform®
Asia Ltd.

Hong Kong

Insituform Asia Ltd. is part of the world-leading Insituform group of trenchless rehabilitation companies and currently does business in Hong Kong.

We manage and control sewer and water main lining projects on behalf of water and wastewater companies. We employ people with long-term experience in the pipeline renovation industry at all levels of our company. We give our clients full traceability through all stages from the manufacture to the installation of Insituform® CIPP.

We enjoy access to the engineering, research and development resources of our Insituform Technologies, LLC, a leading provider of proprietary technologies and services for rehabilitating sewer, water, energy and mining pipelines and corrosion protection of industrial pipelines.

Our portfolio of products to include Insituform® CIPP, iPlus Infusion®, InsituMain®, Thermopipe® and InsituGuard®.
