Stronger. Safer. Infrastructure.®

Insituform®
Pacific

Australia

Insituform Pacific Pty. Limited is part of the world leading Insituform group of trenchless rehabilitation companies.

We manage and control sewer and watermain lining projects on behalf of water and wastewater companies. We employ people with long-term experience in the pipeline renovation industry at all levels of our company. We give our clients full traceability through all stages from the manufacture to installation of Insituform® CIPP.

We enjoy access to the engineering and research and development resources of Insituform Technologies, LLC, a leading provider of trenchless rehabilitation solutions for wastewater and water pipelines.

Our portfolio of products include Insituform® CIPP, iPlus Infusion®, iPlus® Composite, InsituGuard®, Thermopipe® and InsituMain®.
